- Inhalation of high levels of essential oils will make Poultry fresh.

GSY-ANTI RD have anti-inflammatory, antibacterial, antiviral, and antifungal activities. It inhibit the cyclo-oxygenase, the main enzyme in the prostaglandin pathway, and thus exhibit an anti-inflammatory property: moreover, It have a cough inhibiting effect. Orally administered, **GSY-ANTI RD** thus used to alleviate cough, throat inflammations, bronchial catarrh and fever the main active component, the 1,8 cineol stops the release of certain "messenger" molecules, so-called mediators of inflammatory reactions, thus preventing the production and secretion of the mucus. The alcoholic constituent of the peppermint oil, namely the menthol, acts as a local anaesthetic and a disinfectant. Inhaled **GSY-ANTI RD** alleviates laryngitis and bronchitis.

Peppermint Oil

The expectorant action of peppermint oil can help clear symptoms of upper respiratory congestion that may start from IB, ND, & common cold. It is a volatile oil, this allows for vapours to be almost directly inhaled through the nasal passages.

Menthol

Menthol has anti bacterial and anti viral properties to inhibit bacterial growth in respiratory tract it acts as natural decongestant and helps in liquification of mucus and treat swollen sinuses. It has refreshing and pleasant aroma.

Eucalyptus Oil

Eucalyptus Oil has anti bacterial and anti viral effects on pathogenic bacteria in respiratory tract. It has anti-inflammatory properties. Inhaled Eucalyptus oil vapour acts as a decongestant. It stimulates immune system.

Vitamin A

Vitamin A is an essential micronutrient throughout the life cycle. Dietary vitamin A deficiency causes decreased performance, decreased infertility or impaired reproduction and depressed T-lymphocyte responses and antibody production in poultry.
